

Welcome to Sicily

#ebhc2015

7th International Conference for EBHC Teachers and Developers

Evidence for sustainability of healthcare

Increasing value, reducing waste

Taormina (Italy), 28th – 31st October 2015

Our adventure started
4909 days ago

The first shot

Evidence-Based Health Discussion List

Subject: conference on teaching ebm/ websites/ sources of materials/ collaboration/ & CATs (or Pearls)

From: Martin Dawes (martin.dawes@public.health.oxford.ac.uk)

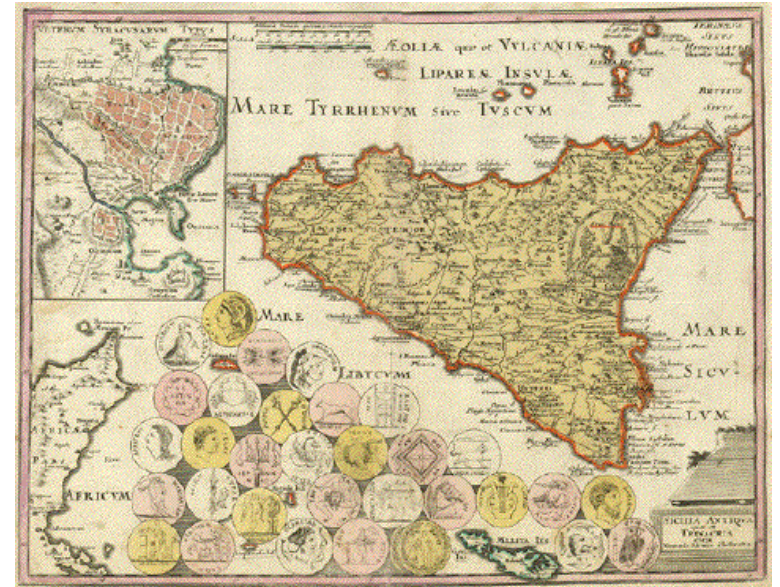

Date: 22 May 2000 - 11:28 BST

My proposal was...

Evidence-Based Health Discussion List

Possibly in Europe,
ideally in Italy,
it would be fantastic in Sicily!

Today's EBHC conference
through 6 previous
memorable Sicilian editions

Do you remember...?

7th International Conference for EBHC Teachers and Developers

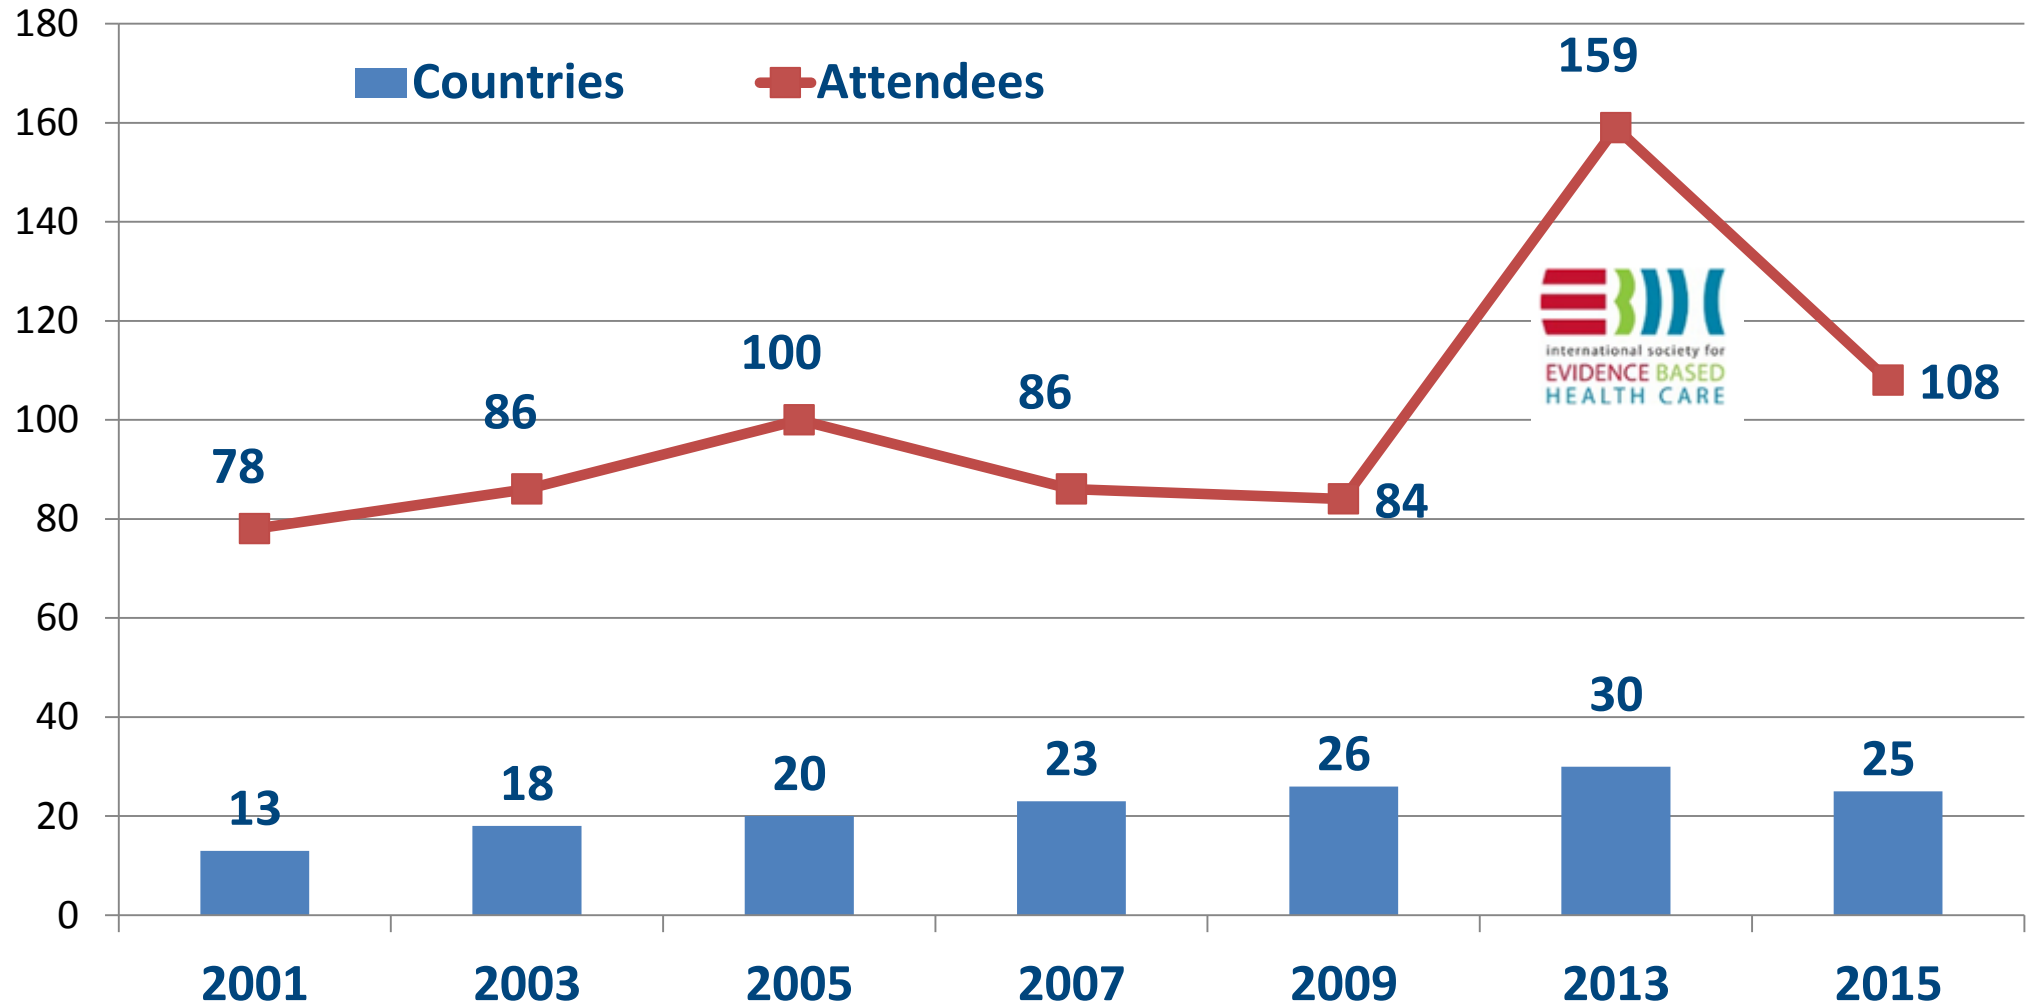

Evidence for sustainability of healthcare

Increasing value, reducing waste

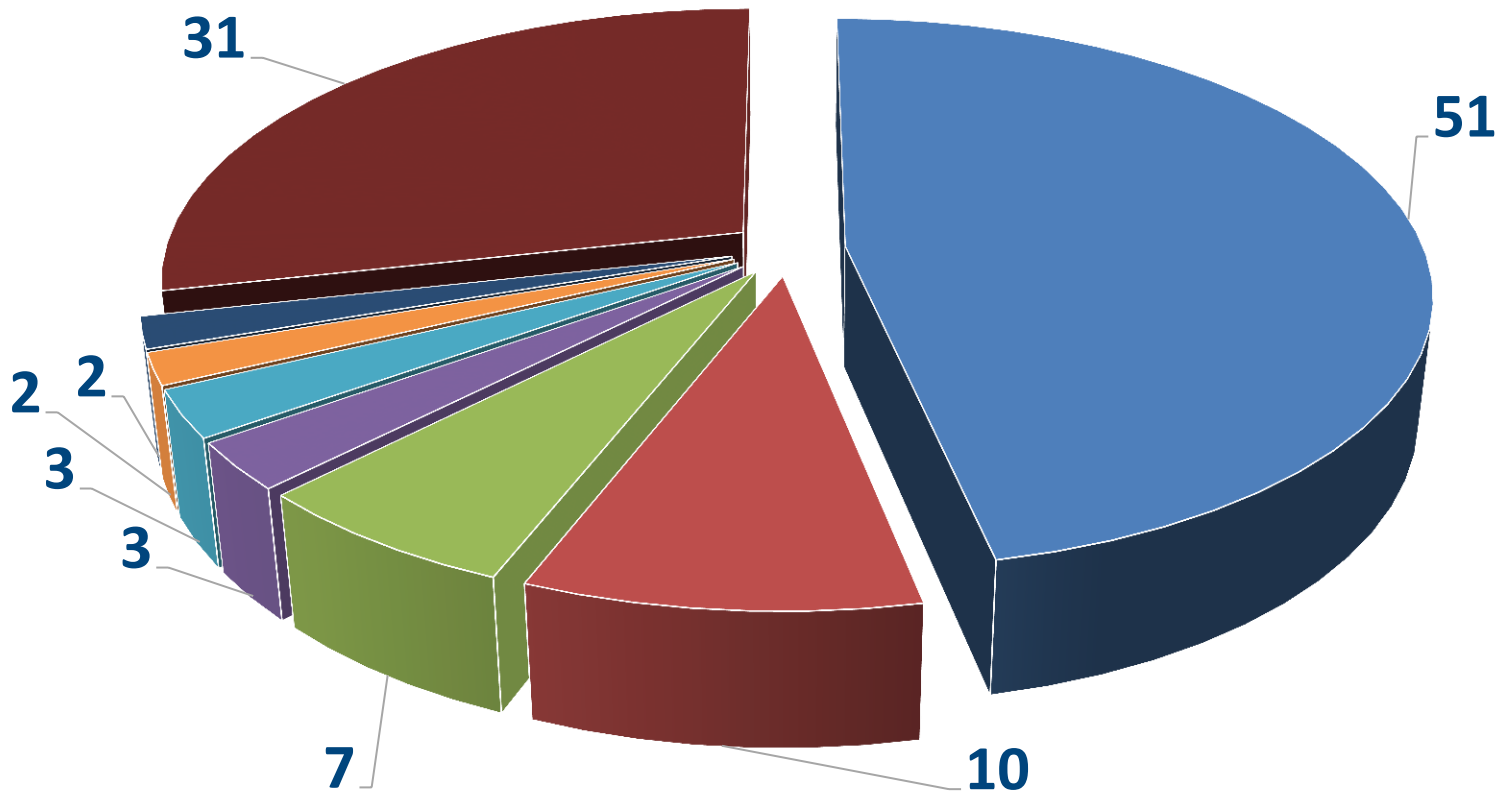

Taormina (Italy), 28th - 31st October 2015

- The sustainability of health systems is a great challenge all over the world
- Health systems have 5 outstanding problems, that can not be solved by increasing financial resources

5 outstanding problems

- Variation in utilization of health care services
- Patient harm from overdiagnosis and overtreatment
- Inequity from underuse of high value health services
- Failure to prevent diseases
- Waste

Muir Gray JA. Offox Press Ltd, 2012

**Inadequate processes of evidence generation,
synthesis, presentation and translation**

Gaps between research and practice

**Waste in healthcare due to overuse, underuse
and misuse of drugs, diagnostic tests
and other health interventions**

7th International Conference for EBHC Teachers and Developers

Evidence for sustainability of healthcare

Increasing value, reducing waste

Taormina (Italy), 28th - 31st October 2015

- Evidence should inform all healthcare decisions at every level: patients, healthcare professionals and policy-makers
- Cuts-based programs to contain costs should be replaced by evidence-informed strategies to reduce waste and increase value of healthcare

7th International Conference for EBHC Teachers and Developers

Evidence for sustainability of healthcare

Increasing value, reducing waste

Taormina (Italy), 28th - 31st October 2015

The aim of the Conference is to promote an evidence-based approach to healthcare to increase value and reduce waste

This is your multicolour schedule...

22.00 23.00						

Beware of using appropriately your unscheduled night time

We will not...

+ AllTrials

All Trials Registered All Results Reported

Thousands of clinical trials have not reported results

Information on what was done and what was found in these trials could be lost forever to doctors and researchers, leading to bad treatment decisions, missed opportunities for good medicine, and trials needlessly repeated.

Hundreds of patient groups, regulators, professional societies and universities, and tens of thousands of individuals have joined the campaign for all clinical trials to be registered and results reported.

Join the AllTrials campaign

- + Find out more and sign the petition at www.alltrials.net
- + Ask your organisation to join the campaign
- + Write a feature, blog post, editorial, or piece for your organisation's newsletter
- + Ask your friends, family, and colleagues to sign up
- + Share the campaign on Facebook and tweet about #AllTrials
- + Donate and get involved in other ways via www.alltrials.net

**Do you know the perfect equation
in the intriguing world of evidence-based...?**

OBSERVATIONS

BMJ CONFIDENTIAL

Muir Gray: Evangelist for walking

In the latest in its series asking the movers and shakers of the medical world about work, life, and less serious matters, the *BMJ* spoke to the pioneer of screening and champion of public health

Who's Muir Gray?

- Muir recently tweeted about himself as the Don Quixote of the NHS: his target is not windmills, but sloppy thinking.
- As chief knowledge officer of the NHS his job was defined by what he does: promoting improved care by the better use of evidence.

Why "evangelist for walking"?

Because obesity, he claims...
is a walking deficiency syndrome
